DIMMER COMPATIBILITY CHART

Visual Comfort & Co. recessed downlights feature the latest in intelligent LED driver technology to operate intuitively across a wide variety of popular dimmers.

This guide provides our recommended compatible dimmers for achieving deep dimming down to 1%, continuous illumination at any output, and uniform performance across luminaires on the same dimmer.

Performance results may vary based on the installation details, fixture placement, and electrical system conditions. Please consult factory for compatibility recommendation on dimmers not listed here.

- Recommendations:
- For phase-cut dimmer, the Low-End-Trim is recommended when available.
 - For 0-10V dimmer, consult the dim curve charts.
 - If dimmer has optional neutral wire connection, then it is required for optimal performance.
 - No popcorn and no pop-on with any recommended dimmer.
